

PowerEdge R430

Powerful, two-socket entry rack server delivers outstanding performance, configuration flexibility, high availability and intuitive management in a short-height (1U), short-depth (24-inch) chassis.

Designed for rack environments requiring peak two-socket performance, sizeable internal storage capacity and short chassis depth to overcome space constraints, the PowerEdge R430 rack server is an excellent fit for high-performance computing (HPC), web tech and infrastructure scale-out. The R430 also serves well for collaboration and productivity applications, surveillance and site security, and is likewise attractive as a dedicated backup or development server.

Deliver peak performance

Drive powerful performance across a wide range of workloads with the latest Intel® Xeon® processor E5-2600 v4 product family. Accelerate performance and grow memory capacity throughput with 12 DIMM slots and DDR4 memory. Boost I/O performance with up to 10 high-IOPS hard drives and two PCIe 3.0 I/O slots, driving 2x data throughput compared to previous generations.

Maximize operational efficiency

Accelerate time to production and drive better ROI by automating deployment with integrated Dell Remote Access Controller 8 (iDRAC8) with Lifecycle Controller. Save time for IT administrators with intuitive, automatable tools for monitoring and update. Control energy budgets with energy-efficient processors, memory, power supplies and Fresh Air 2.0 capability.

Discover greater versatility

Deploy powerful performance into space-constrained environments with short-height (1U), short-depth (24-inch) chassis. Harness data explosion with scalable internal storage capacity – up to 10 x 2.5" hard drives. Adapt flexibly to changing workload conditions with an expandable platform ready for virtualization and high-availability clustering.

Innovative management with intelligent automation

The Dell OpenManage systems management portfolio includes innovative solutions that simplify and automate essential server lifecycle management tasks – making IT operations more efficient and Dell servers the most productive, reliable and cost effective. Leveraging the incomparable agent-free capabilities of the PowerEdge embedded iDRAC with Lifecycle Controller technology, server deployment, configuration and updates are streamlined across the OpenManage portfolio and through integration with third-party management solutions.

Monitoring and control of Dell and third-party data center hardware is provided by OpenManage Essentials and with anytime, anywhere mobile access, through OpenManage Mobile. OpenManage Essentials now also delivers Server Configuration Management capabilities that automate one-many PowerEdge bare-metal server and OS deployments, quick and consistent replication of configurations and ensure compliance to a predefined baseline with automated drift detection.
